NOTICE OF PUBLIC INFORMATION CENTRE
SARNIA WATER DISTRIBUTION SYSTEMS
MODELING AND HYDRAULIC ASSESSMENT
MUNICIPAL CLASS ENVIRONMENTAL ASSESSMENT

The City of Sarnia Water Distribution System (Sarnia WDS) is a part of the Lambton Area Water Supply System (LAWSS). The Sarnia WDS is a large Municipal Water Distribution System serving approximately 25,000 customers. The complete Sarnia WDS consist of approximately 543 kilometers of watermains.

In order to provide an environmentally sound and sustainable framework for the provision of municipal water services for both existing and future development within the City for 20-year growth and occupancy projections, a Master Plan is required.

This project is being conducted as a Master Plan under the Master Planning requirements of the Municipal Class Environmental Assessment (MCEA) October 2000, as amended in 2007 & 2011. Under this process, agency and public input is invited for incorporation into the planning and design of this project.

A Public Information Centre (PIC) will be held to present the study objectives and to obtain public and agency input on the project.

Date: Wednesday February 12, 2014
Time: 7:00 PM to 9:00 PM with a presentation at 7:30 PM
Location: City Hall, 255 Christina Street North, Sarnia, ON

For further information on this project, or if you have any questions regarding the study, please contact one of the people listed below.
